5. Basic Node js
6. Learning React js

## EDUCATIONAL BACKGROUND

Hyperverge Academy 01-12-2021

In Hyperverge I completed Dsa, Django and now I am learning React js.

Navgurukul 22-11-2020 to 31-11-2021

In Navgurukul I completed Python, Javascript, and Basic Node js.

R.P.P.Inter College June-2016 to June-2020

In R.P.P.Inter College I completed my 9 th to 12 the from Science Subjects.

## NODE PROJECTS

### Crud(code)

Here we performed crud operations by using Mysql, Database, and Express.

## HYPERVERGE ACADEMY PROJECTS

### Blog(code)

### Tic Tac Toe(code)

### Todo App in React(code)

## PYTHON PROJECTS

### Hangman(code)

In Hangman we guess one word after that we gave the chance length of the word. If we guess the correct letter so it put the place of the letter in a word, If we guess wrong so it creates one hangman image.

### Login Signup(code)

In Login Signup we create a backend code. If we did not signup so signup but, before we already signup so it is showing data already exists and we will do Login after each Login and Signup We store our data in JSON format

### WebScraping(code)

In web scraping, We scrap the data from the website and store it in JSON format. In webscripng, by using BeautifulSoup we scrap the data.

### Request(code)

In Request, we send the request to any website and get the data from this website.

## JAVASCRIPT PROJECTS

### Calculator(code)

In Calculator we use html and javascript ,in html we gave the structure and by using javascript we wrote function for submit button.If we put user input and then submit then your program output will be come.

### Color Flipper(code)

In Color Flipper we gave one input if we put color and click then the color will be changed the sheet.

### ToDo List(code)

In ToDo List we store out data if we put our task after some time it is completed so we want to delete so we can, We will delete it one by one also and at a one-time all also.
